Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/599,490	Applicant(s) RUSSKE ET AL.	
	Examiner Dennis H. Pedder	Art Unit 3612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on amendment of 9/29/2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2, 5, 7, 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is indefinite in “and/or”.

Claim 5 is confusing in “closure mating” for --mating closure element--.

Claim 7 is indefinite in “especially”.

Claim 11 appears indefinite as it does not limit claim 1 in its functional phrase.

Claim Objections

3. Claim 11 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The functional phrase “for releasable attachment...” does not limit the subject matter of claim 1.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the control unit, claim 1, the activated closure and mating closure element of claim 2, details of claim 8 and 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Art Unit: 3612

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Art Unit: 3612

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-3, 5-7 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. in view of either Prenger et al. or Kaltz et al

8. Okada et al. have all claimed details less the handle for manually moving the top, a detail known in this art as evidenced by the patents to both Prenger et al. or Kaltz et al. in the shape of the front bow, fully graspable for closing.

9. It would have been obvious to one of ordinary skill to provide in Okada et al. a handle shaped front bow as taught by either Prenger et al. or Kaltz et al. in order to move the top manually upon automatic system failure, for example.

10. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. in view of Prenger et al. or Kaltz et al. as applied to claim 1 above and further in view of Hacker.

11. It would have been obvious to one of ordinary skill to provide in the combination above a release operating element 26 as taught by Hacker in order to control the pre-opening of the roof or conversely to release the latch upon CPU failure.

12. Claims 8, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. in view of Prenger et al. or Kaltz et al. as applied to claim 1 above and further in view of Hahn et al.

13. It would have been obvious to one of ordinary skill to provide in the combination above hydraulic motor operation as taught by Hahn et al. in order to reduce electrical load and further

Art Unit: 3612

obvious to mount the drive on the body frame (windshield header) as taught by Hahn et al. in figure 2 and column 2, lines 34-35.
